I can't remember how I first found this book years ago, but it's been on my nightstand ever since. I continuously read this book finding new gems each time.

One effect from this idea I often see people miss and I believe is important is group size and behavior. So I started to read and write to learn what works and not and why. There are feelings involved, confused thoughts, and worries over finances and even custody if you have children. Useful and good enough guide me. As Newton wrote, ¢ÃÂÂIf you press a stone with your finger, the finger is also pressed by the stone.¢Ã Same as revenge (reciprocation). Which concepts from Buffett/Munger/Mental Models do you find most counterintuitive? And for me this is fun. And you will find a lot of quotes in there that most people haven¢ÃÂÂt read before. Once a big corporation asked for his services to solve a problem their 60 highly educated engineers could not solve. Like Buffett once said of Ben Graham¢ÃÂŝ ideas, ¢ÃÂÂI think that it comes down to those ideas ¢Ã although they sound so simple and commonplace that it kind of seems like a waste to go to school and get a PhD in Economics and have it all come back to that. They have a clear notion of what they want to achieve or avoid and then they have this ability to zoom in on the key factor(s) involved. The ending is always the same: Money flows from the gullible to the fraudster. Since some models don¢ÂÂt resemble reality, the word ¢ÄÂÂmodel¢Ã for me is more of an illustration/story of an underlying concept, trick, method, what works etc. It took a lot of fun to figure it out and I learnt much more and it stuck better than if I just had tried to memorize what somebody else had written. Just as in medicine where a whole body scan sees too much and sends the doctor up blind alleys. The wisdom in Buffett¢ÃÂÂs advice that ¢ÃÂAYou only have to be right on a very, very few things in your lifetime as long as he or she avoids big mistakes.¢Ã What¢ÃÂAs the best investment of time/effort/money that you¢ÂÂAve ever made? One that immediately comes to mind is one I have mentioned in the introduction in two of my books is someone I am fortunate to have as a friend ¢Â Peter Kaufman. We suggest MyDivorcePapers.com as a trusted source that makes completing the necessary documents easy. And there are different books and articles that made a difference during different periods of my life. There is a certain natural tendency to overlook anything that simple and important. ¢Â (I must admit that in the past I had a tendency to be extra drawn to elegant concepts and distracting me from the simple truths.) What things have you come to understand more deeply in the past few years? And as he said, ¢ÃÂÂYou understand it better if you go at it the way we do, which is to identify the main stupidities that do bright people in and then organize your patterns for thinking and developments, so you don¢Ã tstumble into those stupidities. ¢Ã Then I ¢ÃÂAonly¢Ã had to a) understand the central ¢ÃÂAconcept¢Ã and its derivatives and describe it in as simple way as possible for me and b) organize what I learnt in a way that was logical and useful for me. My now deceased father-in-law was an inventor and manager. On a scale of 1 to 10, he is a 15. Where should you lean on it, so the table will be the most unstable?¢ÄÂAThe student¢ÄÂAs solution was, ¢ÃÂAProbably on top of one of the legs, but let me see: I¢ÃÂÂll calculate how much force will produce what lift, and so on, at different places.¢ÃÂÂThen I said, ¢ÃÂÂThen I said, ¢ÃAÂThen I said, ¢ÃAÂThen I said, ¢ÃAÂThen I said, ¢ÃAÂThen I said, ¢AA just simplicity itself. A & "Buffett - our ideas are so simple that people keep asking for mysteries when all we have are the most elementary ideas ... There's nothing remarkable about it. How to register your divorce documentation you need to have lived in the state in which you are requesting divorce for three months and six months before the forget how I behaved myself or would have behaved if I put someone else's shoes (and the importance of seeing things from various views). That I have to "Pick My poison - since there is always a set of problems attributed to any system or approach - can not be perfect. This includes properties, assets, debts, children and alimony. After completing the proper documentation and accurately determining the correct municipality to enter, all you need to do is actually file the divorce petition in the county employee. I want to avoid problems - stop them from the beginning. What have you learned more from the lessons of Buffett/Munger when you studied them over the years? And most of our trends were already known by the classic writers (Publius Syrus, Seneca, Esop, Cicero etc.) others that I find very useful both in business and in particular are the quantification ideas (without extravagant mathematics), safety margin, Backups, trust, weaker restrictions/link, good or bad economy reduce competitive advantage opportunity cost, scale effects. You can get in trouble. what would happen if you pushed directly down on a leg?" "Nothing!" I say: "That's right; and what happens if you push down near the edge, halfway between two legs? "This turns!" I say, "ok! this is better!" the point is that these were not just mathematical problems; they described a real table with legs. I follow deng xiaoping, "I don't care if the cat is black u white while it catches mice." as feynman said, "What is the best method to get the solution for a problem? can be grueling both physically and mentally to pass through the divorce process. I did that because I had an interest in getting better. Then I said to myself: now I am 42 years old. is a quick, easy and effective way to finish and finish the process. the meeting and learning of certain people and my own practical experiences have been more important in my development. the worst part is having only a small harmless and senseless error can often result in a rejected form, causing unnecessary delays in processing your divorce. I know of some businesses that understand the importance of this and divide companies into smaller companies when they become too large (an example is the deco). and if I can't write something that is assigned to churchill - should occasionally check their intentions and strategies against their results. none of my writings started as a book project. but the reality is what munger once said: "All the experience is that you teach only what a reader almost knows, and that rarely." but I'm happy for mu mu meret sorvil suem and did the difference for some people. But in the end, what they got is the knowledge of the driver, disguised as real knowledge. There's not a single book or a single idea that did it. But I don't judge or care what others label or do - models, concepts, standard positions... The important thing is that everything we use, reflects and agrees with the reality and that works so that we Help us understand or explain a situation or know what to do or not do. As Buffett says: "Process information very quickly, since I have filters in my mind. The more complicated the process is, the less effective it is. He said that we should not be concerned about ideal or better procedures, but good enough about a number of possibilities that will probably happen in practice - circumstances that the world really presents us. These two gentlemen are excellent in their instant ability to exclude bad ideas, which does not work, bad people, scenery who do not matter, etc. And I focus on consequent decisions. I don't want to be a big problem. Mr. Bevelin has a new book full of wisdom by Warren Buffett & Charlie Munger: Everything I want to know is where I will die as soon as I will never go. You have the ability to register divorce with a real-life lawyer, but also have the ability to register online divorce. Another example that is counter-intuitive is Newton's 3D law that forces work in pairs. In fact, that would have removed a lot of motivation. One seed was first planted when I read Charlie Munger's lecture, a lesson about worldly wisdom and another in which he referred to Darwin as a great thinker. Both phenomena, however, periodically flourish in our country-they are the dream of all promoters-though often appear in a carefully elaborate disguise. But you almost described, roughly speaking, a real table and, knowing what a real table does, you can have a good idea of what this table does without having to calculate anything - you know where you need to lean on To make the table turn. So, how to explain that, I don't know! But since you have the idea that problems are not mathematical problems, it helps a lot. Either way, this is just two ways to solve this problem. So, even if sometimes appear as advice to the reader, I always think about what the Mateman Gian-Carlo Rota once said: .Al How do you define mental models? Seeking wisdom because I had to do a lot of research - reading, talking to people etc. Of course if you are doing everything online you can find the electrical file system of your county. In addition, you need to make sure you have the right county over the petition. A trick or in the realization that I see many of not fighting why it goes against our normal tendency to focus on, for example, what we want to reach or confirmations instead of what we want to avoid and distrust. I wrote my first book â € "seeking wisdom â €" as memorant to me with the expectation, but as Herbert Simon once said: "The situation has gota guess; This suggestion provided specialized access to the information stored in the memory and the information provides the response. I also spent some time at a neuroscience institute to better understand how our anatomy, physiology and biocamics restricted our behavior. An excellent thinker and a great business and human being. I learn and write because I want to be a little more bad day by day. Or vou understand or not not. Are there people of mental models that you think are misinterpreted or misinformed? In fact, it was not a real table, because it was perfectly circular, the leas when you obtain new facts or information is very much. What to do or what to explain? Let me finish this with some quotes of my new book, which I believe we can all learn:  $\hat{a} \in \infty$  The reasons why our ideas are not spreading faster that they are very simple. Something that resisted the time test. This trust, affection and selfless actions break as the size of the group increases, which is obviously important to know what junction and selfless actions break as the size of the group increases. "circle circle circle, keep a paragraph of the approach of the law school of the USC Gould of Munger, so when I deal with certain problems, I don't mistake In believing that I am Max Planck when I am really the driver: in this world, I think we have two kinds of knowledge: one is the knowledge of Planck, that of the people who really know. Feynman, Michael A. Especially in the field of brain biology and science, because I wanted to first understand what influences our behavior. It takes only curiosity and desire to know and understand - real interest. Unfortunately, many people absorb many new books and information without thinking. Have fun, clean it up and everything else. "What book did you learn more from the experience of writing/collecting? I'm pretty pragmatic - whatever works is fine. fine.
